Mekanik har erstattet kommerciel logik

First Principles of Commercial Excellence

Vi har verdensmesterskabet i mekanik

Programmatic. CRM. AI. 1.000 annoncer før bureauet har lavet storyboardet til én.

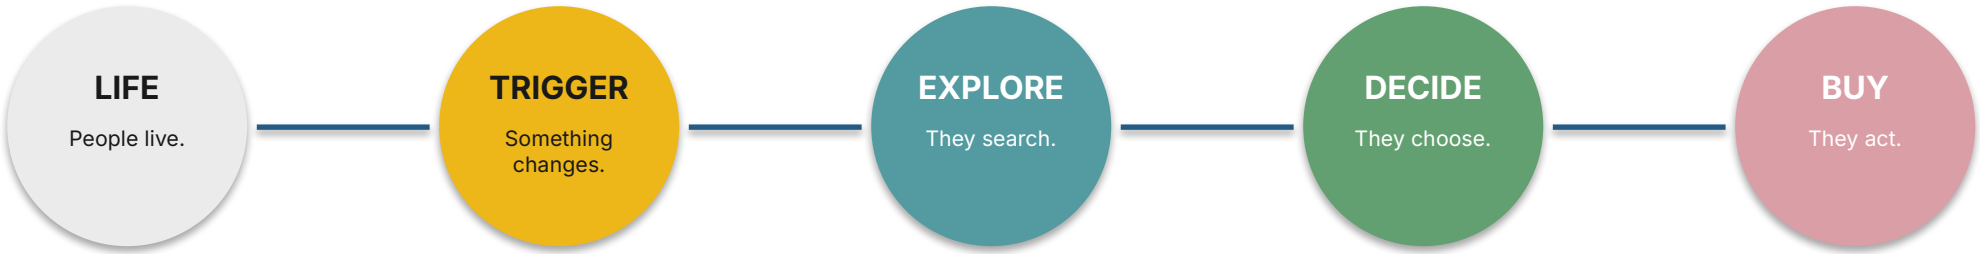

Men hvor blev købmanden af?

Problemet er ikke mangel på AI, CRM eller martech.
Problemet er, at mekanikken har erstattet den kommercielle logik.

Vi kan bruge 8-cifrede beløb på media + tech — og stadig ikke svare klart på:
Hvorfor skal kunden vælge os i dag frem for i morgen?

Vi optimerer klik, mens den kommercielle mekanisme lækker værdi.

Ingen køber produkter – indtil de pludselig gør

BE READY	BE KNOWN	CONSIDERATION SET	REASON TO ACT	MAKE IT EASY
Be visible	Be relevant	Compelling offer	Why now	Click · Call · Book

Most of the time people live their lives. Then something changes.
Commercial Excellence is being relevant at that moment — and making the next step easy.

TRIGGER: Find movement, not just audiences

What actually changes?

- Telefonen bliver dårlig
- Bilen skal udskiftes
- Nyt job · nyt hus · ny familie
- Børnene flytter · ferien nærmer sig

Data + AI's commercial superpower

Not only:
"Who looks like our customers?"

But:
"Who is moving into our category?"

Life events | **Intent signals** | **Entry signals**

That is where data becomes commercial — not merely demographic.

WHAT: Do you have something worth selling?

Remove your logo.

Put a competitor's logo on it.

Does the message still work?

IF YES:

You have a WHAT problem.
Not a media problem.

A strong product, price or proposition makes growth easier.

AI can distribute mediocrity extremely efficiently.
It cannot make mediocrity unique.

WHY NOW exists twice

1 · WHY CATEGORY NOW?

Why does the need appear?

New home → new kitchen

New family → bigger car

Old phone → new phone

2 · WHY BUY FROM US — NOW?

A reason to act — not merely to prefer.

20% off · Trade-in · Free install

Bundle · Limited offer · Financing

Without a reason to act?
“Later.” And later becomes never.

EGO: We buy identity, not just function

Toyota · Volvo · Tesla · Porsche solve broadly the same mobility problem.

TOYOTA	VOLVO	TESLA	PORSCHE
Reliability	Safety	Technology	Status

Customers buy function + identity + reassurance + status + values + story.

Commercial relevance is not only: “Does it work?”
It is also: “Is this for someone like me?”

HOW: When they want to buy, stop making it hard

$$\frac{\text{Value} \times \text{Relevance} \times \text{Desire}}{\text{Friction}}$$

We spend a fortune on the numerator. We tolerate too much in the denominator.

CLICK | CALCULATE | BOOK | PAY | CALL ME

Every extra click. Every unnecessary field. Every “we’ll get back to you.”
A small friction repeated at scale becomes a large commercial leak.

CHANNEL: Technology is a tool, not a strategy

SIMPLE PURCHASE

Need → Offer → Click → Buy

Digital can be perfect.

COMPLEX PURCHASE

Explore → Dialogue → Trust → Persuasion → Deal

Digital finds & nurtures.
People often close.

**The greater the value, complexity and perceived risk,
the greater the potential value of human persuasion and deal-making.**

“Technology first” is the wrong philosophy. Customer economics first.

Glade Advisory Commercial Excellence System

MARKET | WHO | TRIGGER | WHAT | WHY US | WHY NOW | HOW | CHANNEL | DEAL | CLV | ECONOMICS

At every stage, ask three old questions:

1. **Is there a real need?**
2. **Do we have an attractive answer?**
3. **Can we convert it profitably?**

Then diagnose the leak:

STAGE	NEED?	ANSWER?	CONVERT?	VALUE LEAK
TRIGGER / WHO	✓	?	?	Signal quality
WHAT / WHY US	✓	?	—	Proposition
WHY NOW	✓	✓	?	Activation
HOW / CHANNEL	✓	✓	?	Friction
CLV / ECONOMICS	✓	✓	✓	Retention / margin

Rank leaks by economic impact → fix the highest-value mechanism first.

Technology multiplies the system.

Fix the system first.

Find the leak → quantify it → prioritise it → fix it → scale it.

That’s not marketing theory. That’s Commercial Excellence.
